SPECIFICATIONS

Housing and Lens

The fixture housing is fabricated from a combination of heavy duty cast and spun aluminum components.

Electrical Components

EncapLED, an IP66-rated ETL and DLC listed LED module system, combines optics and heat sink into one configurable unit which give precise light distribution. Available in types II, III, IV & V. It allows us to do 10w., 30w. & 40w. increment adjustment on light output. The module achieves 110-120 lm/w efficacy with LUXEON LUMILEDS TX CHIPS. Beside maximizing heat dissipation surface, we also utilize convection-based heat management which creates additional air flow around each chip. Unlike a big metal heat sink where the temperature for the chips in the middle is higher than the rest, the heat of each EncapLED chip gets dissipated evenly. A better heat dissipation design keeps the junction temperature low and ultimately prolongs the life of the LED chips. Our modules are available in any of our fixture designs, as well as in a simple retro-fit kit form for existing fixtures.

Certificates & Warranty

- DLC
- ETL
- Suitable for wet locations
- 5-year warranty

Mounting

Fixture can be installed on post-top.

Tenon top mounting options:

- over 3" OD (standard)
- over 2-3/8" OD

Fixture can also be installed on mounting arms, sold separately. See architectural arm .pdf for style options.

Finish

Thermoset polyester oven-baked powder coat, in any standard color. Custom colors are available to your specification.
